

Governmental Affairs

The PSAR Government Affairs program is focused on working with the legislative and regulatory bodies that affect REALTORS®. The Association's Government Affairs Director serves as an important link between local, state, and national government affairs issues and maintains an intimate awareness and understanding of those issues.

Here are a few of the things your Government Affairs Department does:

- Monitors the City Council dockets for the City's of Chula Vista, National City, and Imperial Beach, and the City of San Diego
- Maintains visibility and recognition with the members of these city journals
- Monitors the activities of the San Diego County Board of Supervisors
- Maintains an awareness of any efforts by school districts, transportation agencies, water districts, or any other local regulatory body that might influence the real estate market, industry practices, or consumers
- Is prepared to address governing bodies at public hearings to express the views of organized real estate
- Maintains visibility with state and national elected officials
- Participates in the election process by conducting interviews, endorsing candidates based on real estate related issues, informing members and the public of those endorsements, and distributing PAC funds
- Develops and maintains supporting relationships with other professional trade groups
- Is aware of vacancies on elected boards and appointed commissions and notifies REALTORS® who may be interested in serving
- Conducts an annual fund raising event to increase the level of REALTORS® financial support for political activity
